
Software Developer
£25 – 35k

A multi-skilled developer with experience of Delphi, C# and SQL required for a permanent position based in St Neots, Cambridgeshire. Experience with XML/XSLT, Oracle and ASP/HTTP would be beneficial.

Assured Information Systems Ltd is a software house specialising in the development of software for the global pharmaceutical industry to monitor and report the safety and quality of human and veterinary pharmaceuticals. Working across all the company's products you will be involved in the full development life cycle of applications, procedures, schemas, transforms, views, etc.

You will work within a team of skilled developers on projects ranging from a few hours to several months.

Requirements:

- Delphi (2 years),
- C# (2 years)
- SQL or PL/SQL (2 years)
- Live within reasonable commuting distance of St Neots

Desirable:

- Oracle
- XML/XSLT
- HTML/ASP
- Experience working in a quality / regulated environment.

This is a great opportunity to work with a small team of developers and gain experience in large commercial systems, large databases and structured development procedures.

Salary £25k – 35k, commensurate with experience.

Please submit your CV by email to keith.edmonds@assured.co.uk outlining how your skills and experience would bring value to Assured in the position applied for, along with your salary expectations.

We request that no agencies apply nor contact us as a result of this advertisement.
